

Acclipse BenchmarkIT — Changing the Database Path

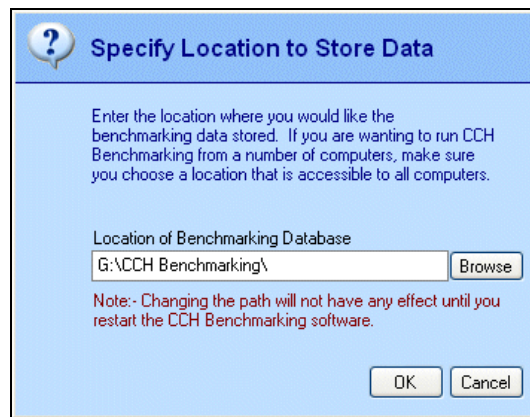

If required you can have multiple server installs (ie databases) for Acclipse BenchmarkIT. For example, you might want to have a separate server install on a laptop to use this when not connected to the network.

To change the database path:

1. Select **Tools** → **Options** → **System Settings**.
2. Click **Browse** to change the path to the location of the required benchmarking data.

TIP: This folder should contain update and template folders.

3. Click **OK**.
4. Close and reopen Acclipse BenchmarkIT.
