

Acclipse Document Manager — Infrastructure Requirements

The table lists the minimum system requirements for Acclipse Document Manager.

NOTE: Acclipse Document Manager is supplied with Microsoft SQL Server Express 2005 to store the document and knowledge base information, but is also designed to work with the full version of SQL Server to allow for scalability for larger sites.

Minimum Server Requirements	Server Recommendations	Your Actual Specifications
<ul style="list-style-type: none"> • 1GB RAM • 2GB free Windows partition • 10GB free storage partition • Windows 2000 SP4 or above • Pentium 3 – 1Ghz processor or above 	<ul style="list-style-type: none"> • 2GB RAM • 5GB free Windows partition • 20GB free storage partition • Windows 2003 • Pentium 4 • 100Mbit full duplex connection 	
Minimum Workstation Requirements	Workstation Recommendations	
<ul style="list-style-type: none"> • 512MB RAM • 2GB free disk space • Pentium III 500GHz • Windows 2000* or above • Microsoft Office 2000* SP4 or above • Internet Explorer 5.5 or above 	<ul style="list-style-type: none"> • 1GB RAM for XP or 2GB RAM for Vista • 10GB free disk space • Pentium 4 • Windows XP Pro • Microsoft Office 2003 • Internet Explorer 6 or above • 100MB network card • 1024 x 768 resolution 	
Terminal Server Considerations		
If you are running a terminal server Acclipse recommends the SQL database is located on a separate server.		
Best Practice Suggestions		
<ul style="list-style-type: none"> • Nightly backup of the server with weekly rotation of tapes, including SQL databases • Virus protection with a minimum of weekly scheduled virus updates 		

NOTE: If your server also runs other services, such as Microsoft Exchange or your practice management software, Acclipse recommends you exceed the server recommendations listed in the table by installing more RAM and purchasing a modern multicore processor.
